-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claim 6 is objected to because of the following informalities:

Claim 6 recites "a protruded portion" and "a plurality of through-holes". However, it is unclear whether these limitations refer to the "flange" and "positioning holes" previously presented in claims 3 and 1 respectively. Applicant is required to clarify this issue and/or amend the claims to conform to the language presented.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Su (US 5,474,459).

Su discloses a combination of an inner frame and at least two blade for a plug the combination including: an inner frame (1) including at least two positioning holes (12,13) and at least two hook members (162 of 17) respectively located adjacent to the at least two positioning holes; and at least two blades (4,5) each extending through an associate one of the at least two positioning holes of the inner frame, each blade including a portion (162) engaged with an associated one of the at least two hook

members, thereby retaining the at least two blades in the inner frame during formation of a housing (Fig.5) of a plug.

Regarding claim 2, Su discloses a positive blade and a negative blade.

Regarding claim 4, Su discloses a ground blade (3) having an engaging hole (31) for engaging with an associated one of the hooks.

Regarding claim 5, Su discloses a separation wall (193) between the positioning holes.

Allowable Subject Matter

Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 6 and 7 would be allowable if rewritten to overcome the objections set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mullen, Jr. et al. (US 6,168,443), Phillips et al. (US 3,457,441) disclose inner frames and blades.
